

Can You Install the HE280 Hotend on Rostock MAX v1/v2 or Orion?

Yes you can install the HE280 Hotend on existing SeeMeCNC 3D printers. Here is what you would need:

[HE280 Hotend \(assembled or kit\)](#)
[Whip](#)

Instruction Guides:

[Machine Upgrades](#)

NOTE: For this upgrade you really need to have the injection molded carriages and Ball Cup Arms installed. If you do not already have them:

[Ball Cup Delta Arm Kit](#) (Orion / Rostock Max)
[Injection Molded Carriage Set](#)

- If you have an old ATX PSU, you *might* need a new PSU. Older power supply units can have trouble putting out enough voltage to keep up with the HE280!
