

Where Do We Ship To?

Do we ship to your country/location & what are the costs?

We most likely ship to your location, there are only a few exceptions. The cost depends on which kit/machines and parts you would like to order. Our checkout system will calculate the cost based on your location, so it is very accurate.

To find out the exact cost of shipping, add the items to your cart and then view your cart. Scroll to the bottom of the page and enter your information into the Estimate Your Shipping Price tool.
